

Service activities of MIREL VZT systems tester

Type **SESVZT**

Illustrative picture

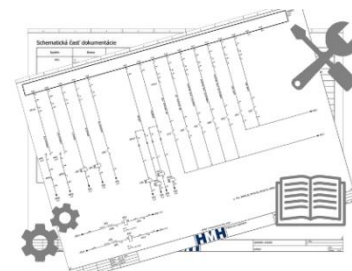

Service activities of MIREL VZT systems tester represent a set of activities aiming the execution of scheduled as well as unscheduled system maintenance.

Service activities of system prophylactic inspection have been specified in 3067VZT SESVZT.D4 Catalogue Sheet.

Service activity for execution of S1 service repair is primarily intended for rolling stock maintenance organizations without corresponding authorizations and staff trained for execution of such activities.

Service activities of S2 operational repair of MIREL VZT systems tester represent a service provided within the framework of unscheduled system maintenance in cases, where the execution of S1 operational repair wasn't sufficient to remedy the failure and internal diagnostics and repair of some components of systems tester or of its MIREL interacting elements is required.

Service activity of MIREL VZT tester calibration represents a service provided within the framework of an unscheduled system maintenance. By means of MIREL VZT tester calibration a correct interpretation of physical quantities from track infrastructure as well as the option to simulate random conditions for MIREL systems are ensured.

Nomenclature

Services

Designation	Description
SESVZT.S1.A	S1 Operational Repair of MIREL VZT Systems Tester
SESVZT.S2.A	S2 Service Repair of MIREL VZT Systems Tester
SESVZT.KAL.0	Calibration of MIREL VZT Tester and of KSV Simulated Code Transmitters

Prepared Services

No record.

Specification

The Catalogue sheet was prepared on the basis of the following specifications::

No.	Version	Title
679VZT	210903	VZT.3 Technical conditions
2339VZT	210903	VZT.4 Technical conditions
502VZT	210531	VZT.3 Operating and maintenance manual
2337VZT	220309	VZT.4 Operating and maintenance manual
3016VZT	220201	SESVZT Implementation conditions
