

## Service activities of MIREL SOL protection system

### Type **SESSOL**

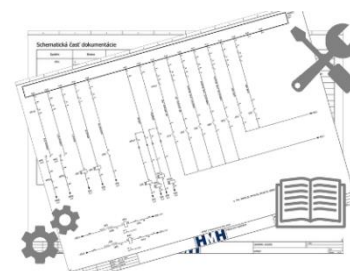

Illustrative picture

Service activities of MIREL SOL protection system represent a set of activities aiming the execution of scheduled as well as unscheduled system maintenance.

Execution of D4 prophylactic inspection servicing activities forms a part of scheduled system maintenance services.

Following rules apply for prophylactic inspection time interval:

- System prophylactic inspection time interval after technical life expiry is 12 months, independent from prophylactic inspection time interval before technical life expiry.
- System prophylactic inspection time interval before technical life expiry is 120 months. Prophylactic inspection must be conducted within next rolling stock major repair. In specific cases, if the major repair periodicity exceeds a 10-year period, the prophylactic inspection must be conducted after 120 months latest.
