

Training Services for MIREL SOL System

SKOL Type

Illustrative picture

Provided training services for MIREL systems represent a comprehensive set of trainings for staff of partner companies for the entire range of activities carried out on MIREL systems.

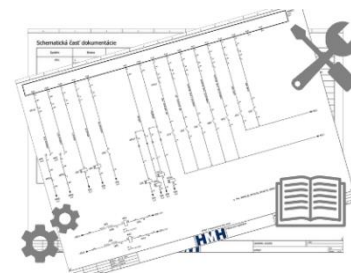

Valid staff trainings represent one of necessary preconditions for partner companies for acquiring authorization concerning integration, installation, activation, maintenance or diagnostic activities on MIREL systems.

Trainings are categorized per individual MIREL systems, partner company authorization types and level of successfully passed trainings in the past.

Update trainings are intended for repeatedly trained staff, prerequisite for passing such trainings category is successful passing of a corresponding training in the past.

Trainings in full extent are intended for personnel without previous successful training graduation in the past.

Selected trainings comprise practical training of trained activities as well.
