

Service Activities of MIREL RM1 Registration Speedometer

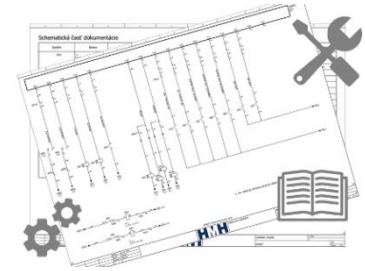

SESRM1 Type

Illustrative picture

Service activities of MIREL RM1 registration speedometer represent a set of activities aiming the execution of scheduled and unscheduled system maintenance.

A part of services concerning scheduled system maintenance is the execution of D4 prophylactic inspection service activities. Prophylactic inspection service activity performance has been classified based on extent of activation services into:

- basic extent
- enhanced extent

Following rules apply for prophylactic inspection time intervals:

- Interval of system prophylactic inspections after technical life expiry is 12 months, regardless of prophylactic inspection interval before technical life expiry. Prophylactic inspection service is carried out in basic extent.
- Interval of system prophylactic inspections before technical life expiry is 24 months in case when previous prophylactic inspection has been accomplished in basic extent.
- Interval of system prophylactic inspections before technical life expiry is maximally 120 months in case when previous prophylactic inspection has been accomplished in enhanced extent. Prophylactic inspection must be carried out upon next major vehicle overhaul. In specific cases, if periodicity of major vehicle overhauls exceeds 10 years period, prophylactic inspection must be accomplished after 120 months latest.
