

Registration speed meter MIREL RM1

Type **RM1**

illustrative picture

The MIREL RM1 registration speed meter is a system constructed for use on railway line vehicles of any traction. The RM1 ensures three basic functions: measuring of instantaneous speed, indication of instantaneous speed and additional information, archiving of instantaneous speed and other operational and technical data in relation to a time and track independent measure. The MIREL RM1 registration speed meter performs continuous self-diagnostics and allows the performing of a functional test for testing the correct functioning of all components of the RM1 speed meter and cooperating devices on a railway wagon. In addition to performing functional tests and protective controls the device is maintenance-free.

Nomenclature

Modifications

For new applications is recommended MIREL RM2 system, see document 1988RM2 RM2 Catalogue sheet.
